> Below you can find final project guidelines.

By the end of the application period you have to do the following:

- Present and demonstrate your group project on Friday, March 24, in Room 402, after 12 : 30. Each group will be given 15 minutes to present and demonstrate the project and up to 10 minutes for questions. Presentations should also be submitted to Canvas due 12 : 00 03/24/17

- Submit a final project report by 23 : 59 03/26/17. We expect that your report will be at a final stage before the time of your presentation. After the presentation you will have a chance to improve in accordance to feedback.

- Submit source code in a single archive by 23 : 59 03/26/17.

The final project report should have up to 5 pages in IEEE conference format and cover the following questions:

- The **ABSTRACT** should summarize your achievements.

- The **INTRODUCTION** should elaborate on those achievements

- The survey of **RELATED WORK** should explain previous achievements in this field.

- Add a section, titled according to your preferences, that describes the main work you carried out: what you achieved, what you implemented, what new solutions you developed, how the work was carried out, what challenges you faced, obtained results.

- In your **REFERENCES**, include authors, title, venue (with volume and number for journal articles), and publication year, according to convention (e.g., bibtex format).

The reports will be assessed for their clarity, structure and organization, technical depth, critical thinking, comprehensibility to non-experts, and demonstrated results. The guidelines for the report given above also apply for the presentations. A presentation should capture the principal points made in your group project report.
